

T5/1.01

FACILITIES IN PORTS FOR THE RECESSION OF OILY WASTES FROM SHIPS

1 It will be recalled that the Government of a Party to MARPOL 73/78 undertakes to ensure the provision of adequate reception facilities in its ports for the reception of oily residues and mixtures as remain from oil tankers and other ships using its ports, in accordance with regulation 12 of Annex I of the Convention, and that Parties to the Convention are required to communicate to the Organization a list of oily waste reception facilities in their ports in accordance with article 11(1)(d) of the Convention.

2 In order to collect and disseminate information on the availability of oily waste reception facilities worldwide for the effective implementation of the Convention, the Marine Environment Protection Committee, at its nineteenth session (MEPC 19), prepared a questionnaire on such facilities, which was issued as MEPC/Circ.117 dated 23 December 1983 to all Member States of the Organization. Upon the instruction of MEPC 23, this circular was re-issued as MEPC/Circ.177 dated 1 October 1986.

3 By MEPC/Circ.177, the MEPC agreed that the information communicated to the Organization on oily waste reception facilities should be updated annually, and that Member States which were non-Party to MARPOL 73/78 were also invited to provide information on such facilities to the Organization for the collection of information on all available facilities.

4 The present circular lists all information on oily waste reception facilities submitted by Governments up to May 1995 and it supersedes its predecessor MEPC/Circ.278 in its entirety. The list of Member States having submitted information on oily waste reception facilities is set out in annex 1 of this circular and the list of oily waste reception facilities in annex 2.

5 Governments are invited to bring this circular to the attention of their Administrations, port authorities and industries concerned.

6 It may be noted that the list of oily waste reception facilities submitted by the United States is in a format slightly different from that contained in MEPC/Circ.177, due to the large number of reception facilities and the standardized procedures for scheduling reception facilities in that country.

*All future revisions to this circular will be issued under the reference "MEPC.3/Circ....".

7 Member States not having submitted information on their oily waste reception facilities are invited to do so, and those Member States that have submitted the necessary information are invited to inform the Organization of any changes to the list of oily waste reception facilities in their ports on a nation-wide port-by-port basis so that the circular can be kept up to date. It is noted that some reception facilities listed in the circular do not have telephone and telefax numbers, which could make communication between the shipmasters and the reception facilities difficult. Member States are therefore invited to provide the Organization with all the information required including telephone and telefax numbers.

8 Should a Member State have no oily waste reception facilities in its ports, it would be appreciated if this could be reported to the Organization, so that the next circular will show that it is not through negligence on the part of that Member State that such information is not included in the circular.

9 It should be noted that this circular is compiled on the basis of information submitted by Governments, and that non-entry of reception facilities in the circular may not necessarily mean that there is no oily waste reception facility in that country.

10 For easy reference by Administrations and shipping companies and to enable compilation by the Secretariat, it would be highly appreciated if all information on oily waste reception facilities, from 1996, is submitted in accordance with the established "one-line" entry format of the present circular for each port.

Attached hereto are the restriction or limitation on the use of facilities (in alphabetical order), which are marked with an asterisk.

ANNEX 1

RESTRICTION OR LIMITATION ON THE USE OF FACILITIES (IN ALPHABETICAL ORDER)

ANCONA:

API Raffineria di Ancona:

Max. dwt: 30,000; pumping rate limitations: 500 m³/h; quantity restrictions 4,000 m³.

AUGUSTA:

Chimica Augusta SpA:

Facilities adequate for needs of Society. Facilities for reception of dirty ballast.

Esso Italiana SpA:

Those forecast from information book about terminals of Augusta Port.

Capo Turno Pontili:

Max. discharge rate 1,300 m³/h. Size range: 500-140,000 dwt. Quantity depending on the available room in tanks. Quality as per above.

BRINDISI:

Capitaneria di Porto:
(O Riveda SRL)

Reception capacity: 150 tons/h; dwt not exceeding: 18,000 t, facility available for company ships only.

Enichem Base S.p.A.:

Max. draught: 9 m. Max L.O.A.: 170 m. Max pumping rate: 100 t/hr.

CAGLIARI:

Saras Raffineria (Sarroch):

Facilities are available to ships performing commercial operations at Saras jetties. For discharge of liquids treated with chemical products an advance request is needed.

Nurachem S.p.A. (Sarroch):

For the discharge of liquids processed with chemical substances, notice must be given as not all chemicals are accepted.

CATANIA:

Capitaneria di Porto:
Deposito AGIP Costiero

Max draught 8.5 m. Max pumping pressure 6 kg. Total capacity: 800 m³.

GELA:

Circomare Gela:

Max. displacement berths 1, 3, 4, 5, 6 - 50,000 t. Berth 2 - 88,500 t. Max. draught - 9.6 m. Max. discharging rate 600 t/hr. One kind of chemical product only. Max. capacity 2,000 kg.

GENOVA:

Porto Petroli Multedo:

Maximum acceptable dirty ballast:
30,000 tons.

LA SPEZIA:

Societa' Petrolifera Italiana

Max. dwt.: 50,000 tons.

Raffineria IP:

Oil tankers max. dwt.: 52,000 tons; maximum pumping pressure: 10 kg/cm² in pipeline, having diameter of 12 inches.

Harbour Master Naval SpA:

Restrictions for security only.

LIVORNO:

Calata Addis Abeba:
(Labromare)

To be defined on case-by-case basis in agreement with facilities' operators.

Labromare Ltd:

Lambromare Ltd: 2 barge capacity: 200 t.
3 barge capacity: 400, 100, 50 t. Pumping capacity: 180 m³/hr.

Stanic S.p.A

Stanic S.p.A.: Co alongside berth length 170 m., berth draught 10.5 m. Max pumping rate 450 m³/hr.

MESSINA

SMEB Cantieri Navali SpA:

Up to ships of 260,000 tons dwt.

NAPOLI

Mobil Oil Italiana S.p.A.:

Tanker dwt: 100,000 t. Max. pumping rate: 3,000 m³/hr. Max. capacity: 16,000 m³.

PALERMO

Compamare Palermo:

The services are carried out by the MC Vittorino Zanibon by a reception of: 2,000 tonnage. These are restrictions on ship categories, pumping rate limit, quantity and quality.

PESARO:

Fox Petroli SpA:

Collection capacity: 400 t.; max. draught in port: 3.80 m. - up to: 1,000 TGT; pumping capacity: 300 m³/h; petroleum products: categories B and C.

PORTO TORRES:

Enichem Ania:
(Zona Industriale)

Fuel pour point lower than ambient temperature.

RAVENNA:

IROM:

Ship's max. length 245 m., width 33 m., draught 8.5 m.

SAROM Raffinazione SpA

Only to be used by tankers discharging or loading at the SAROM refinery.

Societa' "Nuova Sitan":

It is impossible to purify water that contains chemical substances.

ROMA - FIUMICINO:

Locamare Fiumicino:
(o Raffineria di Roma)

9,000 m/c dirty ballast water.

Locamare Fiumicino:
(Marine Dept.)

Max. volume available is 10,000 cubic metres acceptable only at 5 pm² max. pressure at ship's manifold is 7 kilos per sq.cm., pumping rate not exceeding 1,000 m³/h.

SAN BENEDETTO DEL TRONTO:

Ditta Napoli (Molo Nord):

Capacity for oily bilge water 2 m³; for sludge 5 m³.

SIRACUSA:

Capitaneria di Porto:

Only oily bilge waters of oil tankers.

TARANTO:

Capitaneria di Porto:

Company ships only.

Industria Italiana Petroli:

System reserved solely for exclusive use of "IP Refinery" of Taranto for ships with max. draught of 6 m, jetty Nos. 1 and 2; 9.6 m for jetty Nos. 3 and 4 and for waters which do not contain: 1. chlorinated solvents.

VENEZIA

Capitaneria di Porto:
(o Montedipe - Venezia)

Possibility of storing on shore is checked on case-by-case basis and rate of discharge is linked to kind of ballast. Only national ballast.

SEZ. "MGP"
(Ing. Sartori, Dott. Tonon)

Oil tankers of deadweight not exceeding 20,000 tons and with draught not exceeding 10 m, can be moored at IROM jetties. For possible discharge and treatment of ballast water, oil and/or slops from ships not destined to load at IROM Refinery it is necessary to obtain advance permission by the Customs Office which constantly watches operational cycle of the Refinery.

SEZ. SIPIA
(Ing. Vianello)
IROM SpA
